Medical Prescription

Patient Information

Name: Anwita Chakraborty

Email: diyachakra.369@gmail.com

Phone: +917224891665

Date of Birth: 2005-09-06

Gender: female

Diagnosis

Without lab results or specific medical research to analyze, the diagnosis remains speculative based on symptomatology alone. Normally, lab values such as white blood cell count, culture results, or specific antibody tests could help in narrowing down the diagnosis.

Confidence Level: 70%

Reported Symptoms

- rash
- red spots
- scabs
- fatigue
- fever
- headache
- itchy rash
- fluid-filled blisters

Prescribed Medications

1. Consult with a healthcare provider for appropriate medication

Care Instructions

Monitor symptoms and seek medical attention if condition worsens

Maintain adequate rest and hydration

Follow up with healthcare provider for comprehensive evaluation
